Instana Agent

Arguments

Environment Variables

CPU Load

User and System show load in percent where 100% equal a single core at full load. Load is computed in the JVM related to the combined processing power and normalized to 1.

● User ● System ● Load

Releases

JVM Memory

● Heap ● Direct Buffers ● Off Heap

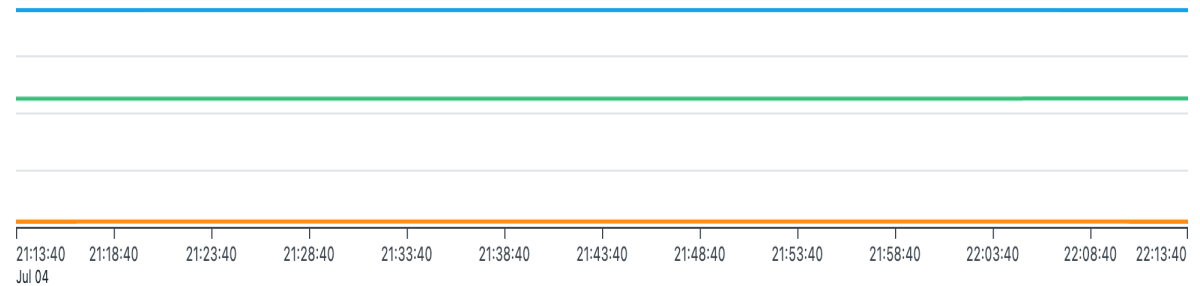

Instana Agent @ reflects1 Instana Agent

System Memory

● Virtual ● Resident ● Share

650.00 MiB

Releases

Garbage Collection

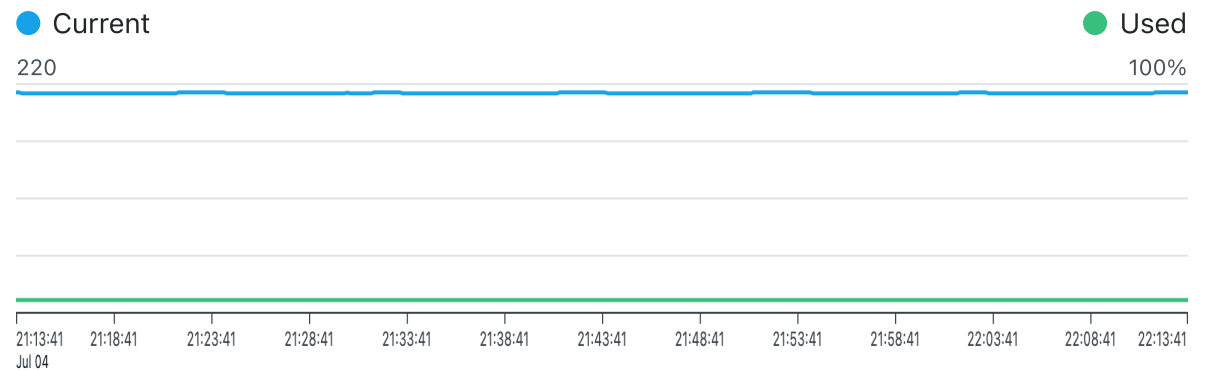

Garbage collectors will report their activation and runtime after they have finished. Depending on the collector, some, if not most, of its activity will be concurrent to the application execution.
